CORE DIRECTIONS

The backbone of STAR3ERP consist of 5 modular systems.

Human Resource . **Finance** . **Sales** . **Inventory** . **Customisation & Workflow**

*These modular systems can work perfectly on its own,
or integrate seamlessly with multiple selections.*

HUMAN RESOURCE MANAGEMENT

♣ EMPLOYEE MANAGEMENT

Manage all your employees through individual profile pages. See the information of your employees like history, earnings etc., in a simple table format.

♣ STAFF SELF SERVICE PORTAL

A self-service portal for staff to login and manage their claims, payslips and leaves, all by themselves. Approval workflow can be designed to up to 3 levels authorisation.

♣ BUSINESS REPORTS

Generate salary and leave report based on staff, department or by company level.

♣ OFFICIAL DOCUMENTS

Prepare official documentation for CPF E-Submission, Bank GIRO, IRAS AIS and IR8A, all compliance ready.

♣ TIME ATTENDANCE (VIA MOBILE APP)

Manage your staff's attendance through an In-house mobile app that allows photo-taking. Available in both Android and iOS platform.
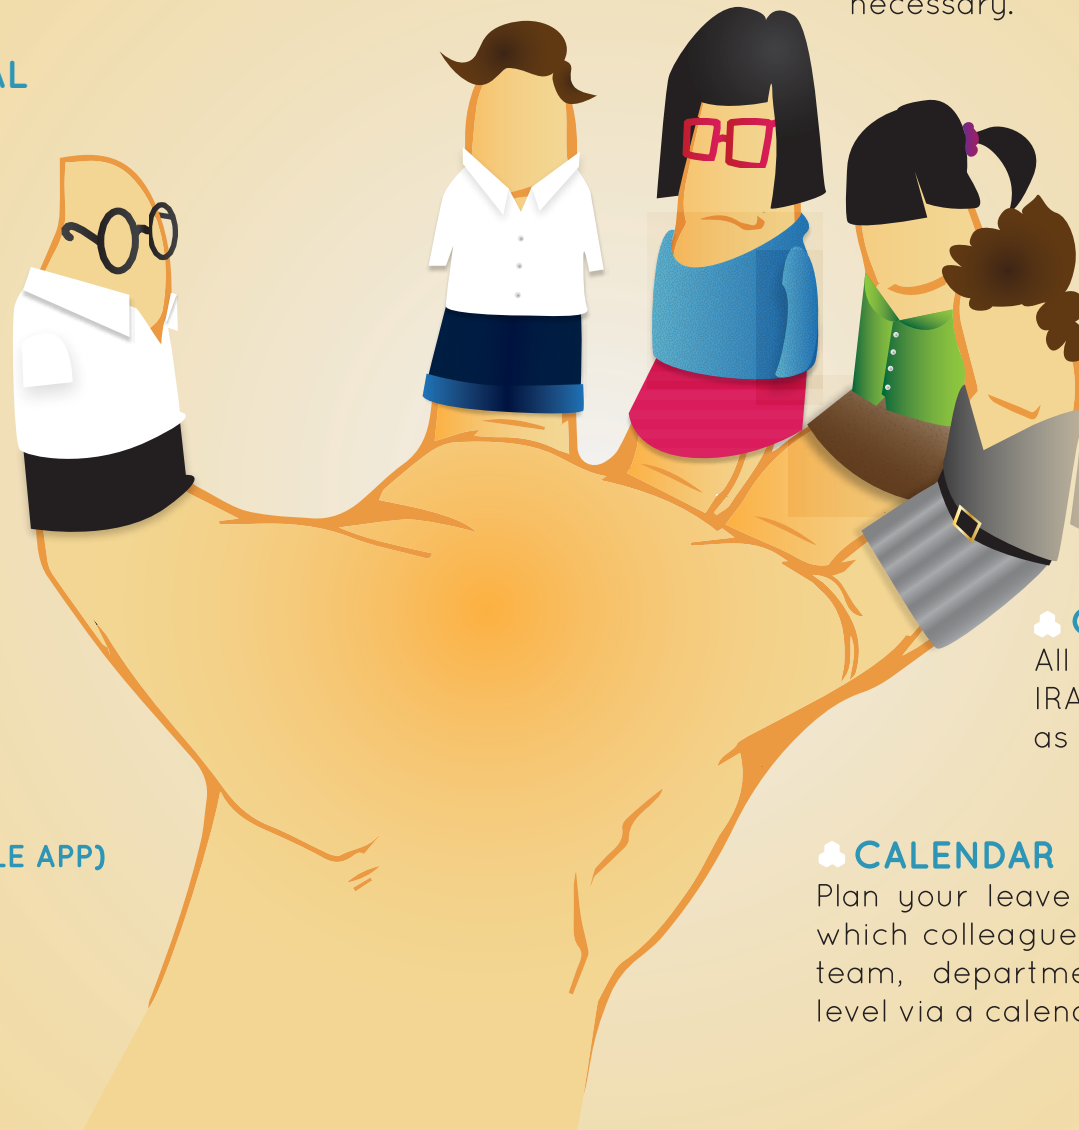

♣ PAYROLL MANAGEMENT

Process payroll in a systematic but flexible manner. System allows monthly, fortnightly, weekly, daily and even ad-hoc generation of payroll.

♣ DOCUMENTATION ARCHIVE & ALERT

Archive all documentation like Certificates, Passes, Permits etc. of your staff at their profile page.

Set system alerts on Pass/Cert renewals if necessary.

♣ CPF/TAXATION

All legislative rulings for CPF and IRAS are updated automatically as and when there are changes.

♣ CALENDAR

Plan your leave easily by seeing which colleague is on leave; on a team, department or company level via a calendar view.

FINANCIAL MANAGEMENT

♣ ACCOUNTING BOOKS

Post all transactions to the relevant accounts – GL, AP, AR etc. Data collected here will be the basis of all financial reports.

♣ BUSINESS REPORTS

Generate Business reports like GST, Balance Sheet, Profit & Loss etc.

♣ CREDIT CONTROL

Use credit control for your debtors to govern the amount of exposure that the company is willing to undertake.

♣ PAYMENT MANAGEMENT

Ensure all payments are made promptly and correctly. Set reminders to highlight unpaid payments.
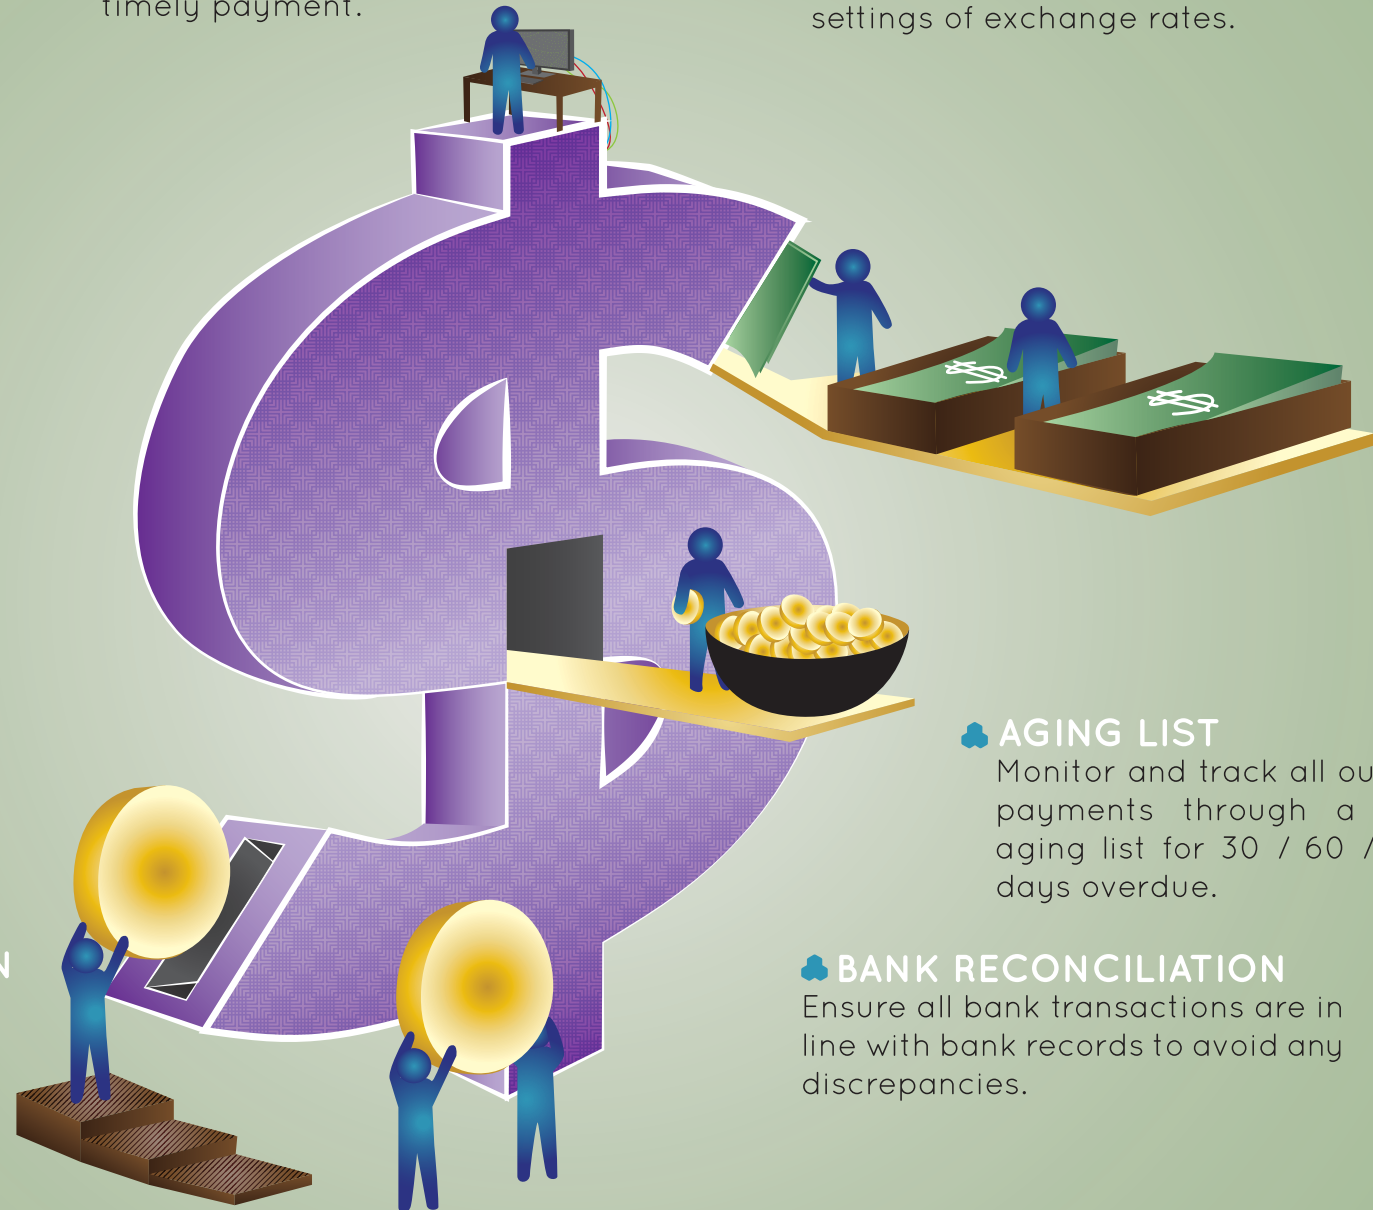

♣ AUTOMATED DOCUMENTATION

Documents can be converted to another type simply by using back the same set of data.

♣ EXPENSE MANAGEMENT

Track all incurred expenses and their respective due dates for timely payment.

♣ MULTI-CURRENCY

Handle multi-currency transactions through global and/or transactional settings of exchange rates.

♣ AGING LIST

Monitor and track all outstanding payments through a standard aging list for 30 / 60 / 90 / 120 days overdue.

♣ BANK RECONCILIATION

Ensure all bank transactions are in line with bank records to avoid any discrepancies.

SALES MANAGEMENT

♣ CUSTOMER MANAGEMENT
Maintain your customer profiles with multiple contacts management. All documentations and sales history is tabulated in each profile for easy reference.
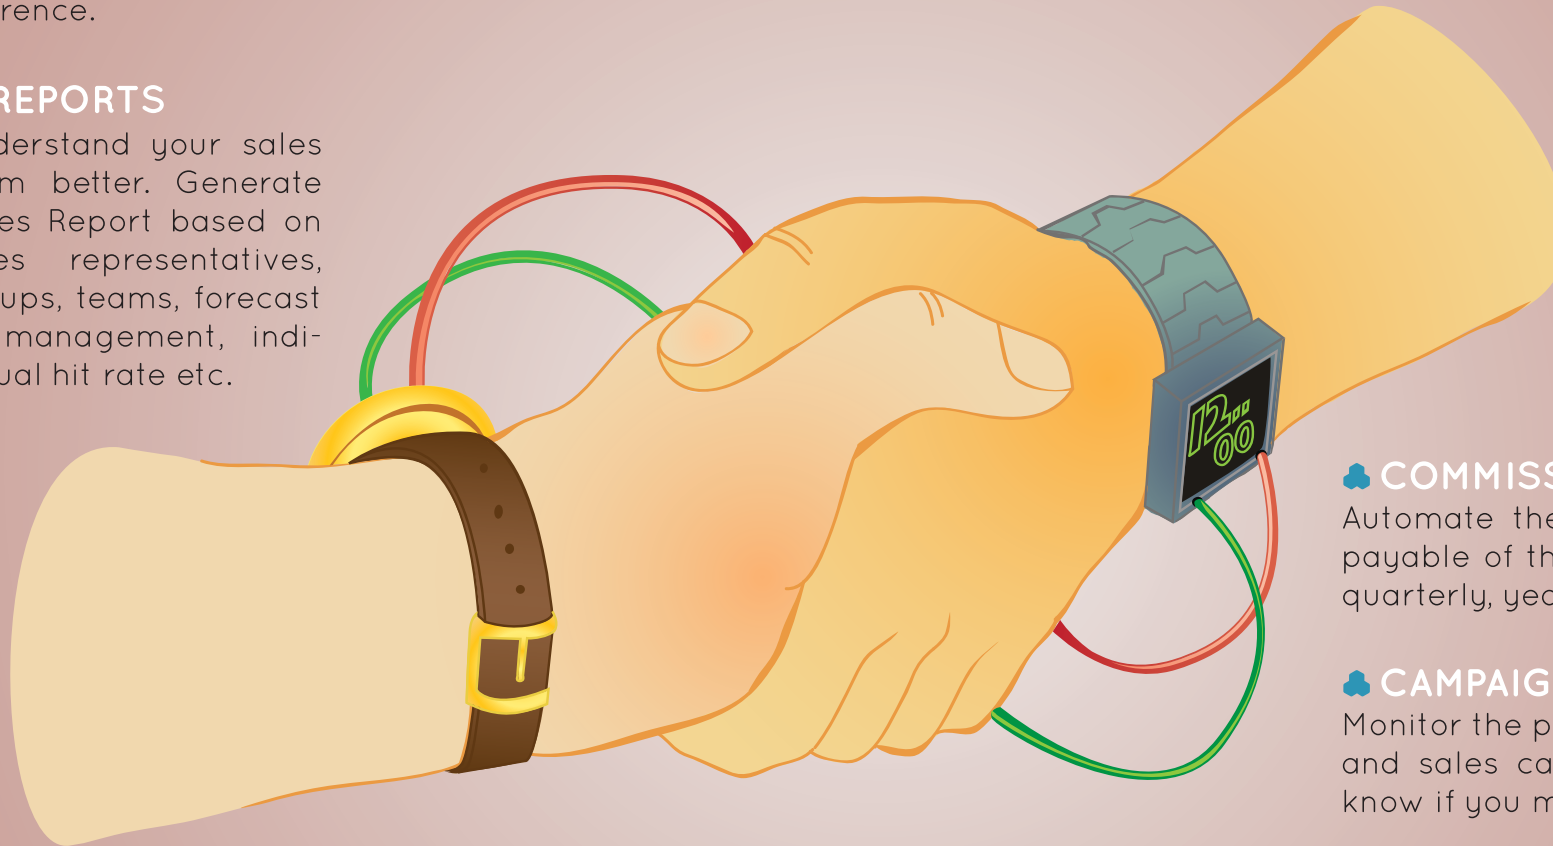

♣ REPORTS
Understand your sales team better. Generate Sales Report based on sales representatives, groups, teams, forecast to management, individual hit rate etc.

♣ QUOTATION BUILDER
Build standardised proposals or quotations across all users through specifically customised templates.

♣ LEAD MANAGEMENT
Follow through the progress of all leads received from start till close and start monitoring the closing rates of your leads correctly.

♣ COMMISSION STRUCTURE
Automate the tabulation of commission payable of the sales team on a monthly, quarterly, yearly or ad-hoc basis.

♣ CAMPAIGN MANAGEMENT
Monitor the profitability for all your marketing and sales campaigns. At least you need to know if you making the right investments.

♣ SMS/EMAIL COMMUNICATION
Inform your customers on the latest promotions that you have through this effectively proven communication channel.

♣ PIPELINE AND FORECAST
Monitor your sales team through their working cases and forecast on the prospective sales. Have the right idea on how each sales member is doing.

♣ SALES ORDER SUBMISSION
Send information and instructions to the management for sales fulfilment.

Automate with routing and optional approval capabilities.

INVENTORY MANAGEMENT

♣ PURCHASE MANAGEMENT
Generate Purchase Orders and manage expenditures effectively.

♣ BUSINESS REPORTS
Generate Inventory reports based on stock level, fastest moving stock, and more.

♣ PICKING LIST
Populate picking instructions through a Picking list on a scheduled or Ad-hoc basis.

♣ STOCK TRANSFERS
Plan and move your stock around for business efficiency.

♣ WAREHOUSE MANAGEMENT
Organise your warehouse efficiently with shelves and racks and system will design the correct picking instructions based on proximity.

♣ MULTI-LOCATIONS
Manage multiple inventory locations and ensure stock accuracy.

♣ SUPPLIER MANAGEMENT
Manage all suppliers systematically. Access information of past purchases, prices, transactions through their individual profile pages.
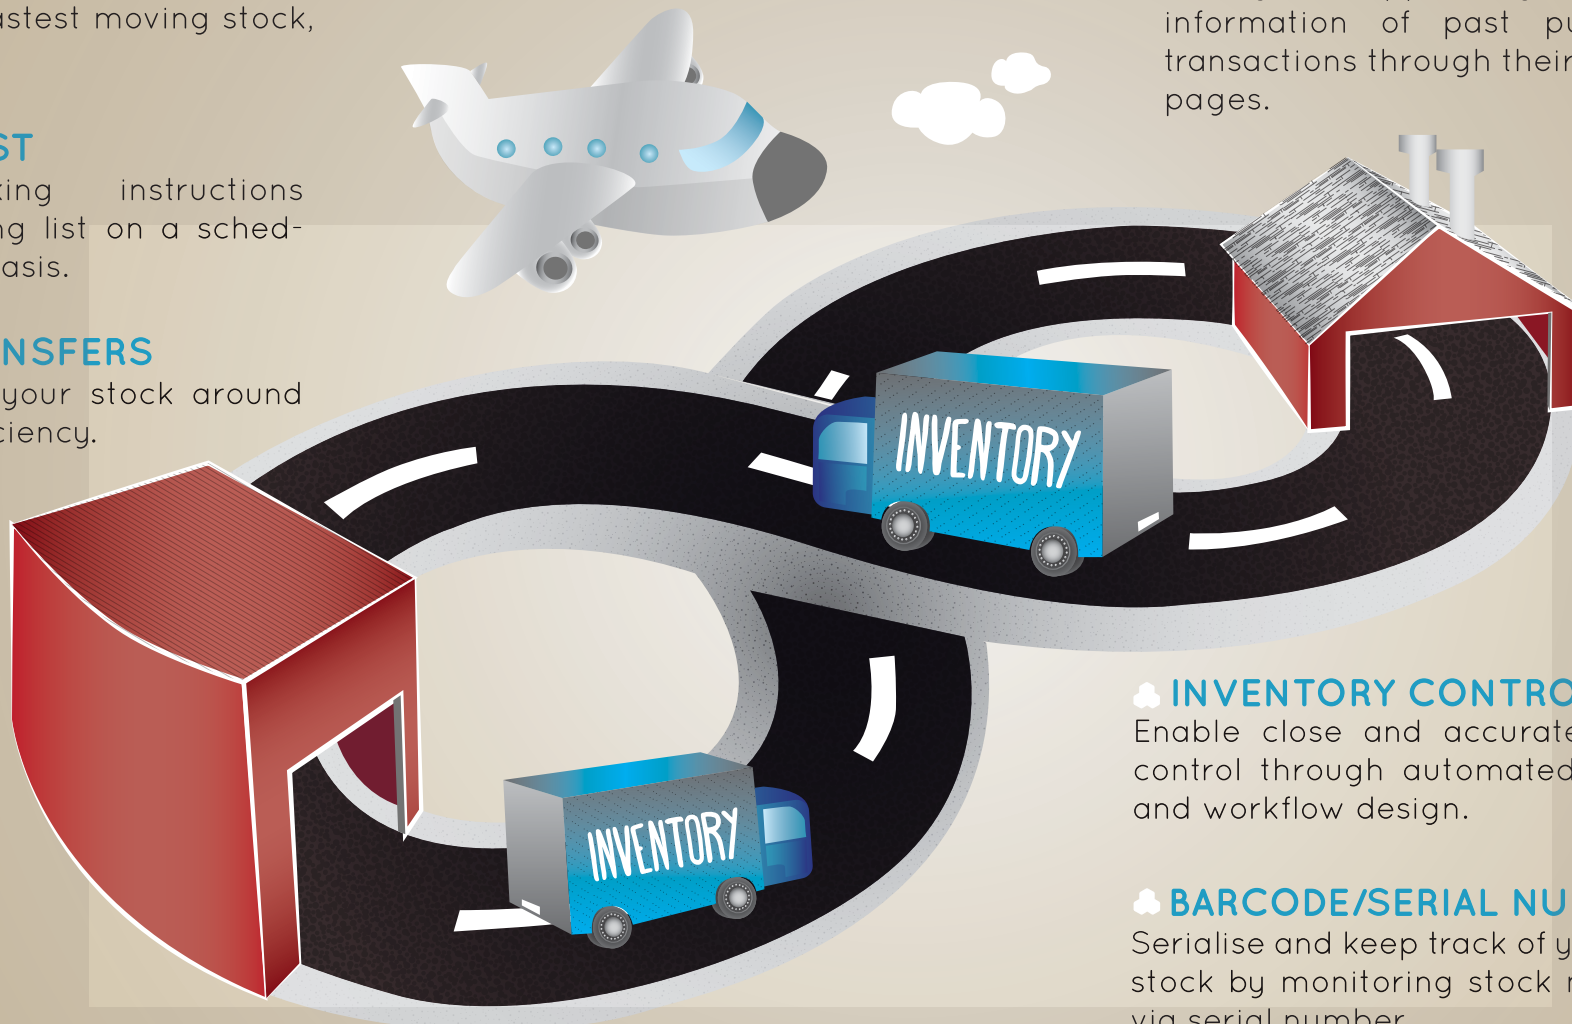

♣ INVENTORY CONTROL
Enable close and accurate inventory control through automated processes and workflow design.

♣ BARCODE/SERIAL NUMBER
Serialise and keep track of your all your stock by monitoring stock movements via serial number.

INVENTORY

INVENTORY

CUSTOMISATION & WORKFLOW MANAGEMENT

♣ WORKFLOW INTEGRATION ACROSS MODULES
Generate Purchase Orders and manage expenditures effectively.

♣ BUSINESS REPORTS
Customise and build any business reports for transparency and decision making.

♣ AUDIT TRAIL
All actions performed by users are tracked to ensure accountability.

♣ API INTEGRATION
Integrate our applications with other software (with API) to ensure all applications can share information seamlessly.

♣ HQ INTERFACE FOR MULTI-LOCATION/BRANCHES
Consolidate business information even when you have businesses located in multiple locations.

♣ APPROVAL PROCESS
All processes and functions can be designed to go through a proper approval process. All routings will be done at the backend level.

♣ SERVICE MANAGEMENT
Service management includes opening a ticket for a service call, assign to specialist, attend to customer and eventually, close the ticket.
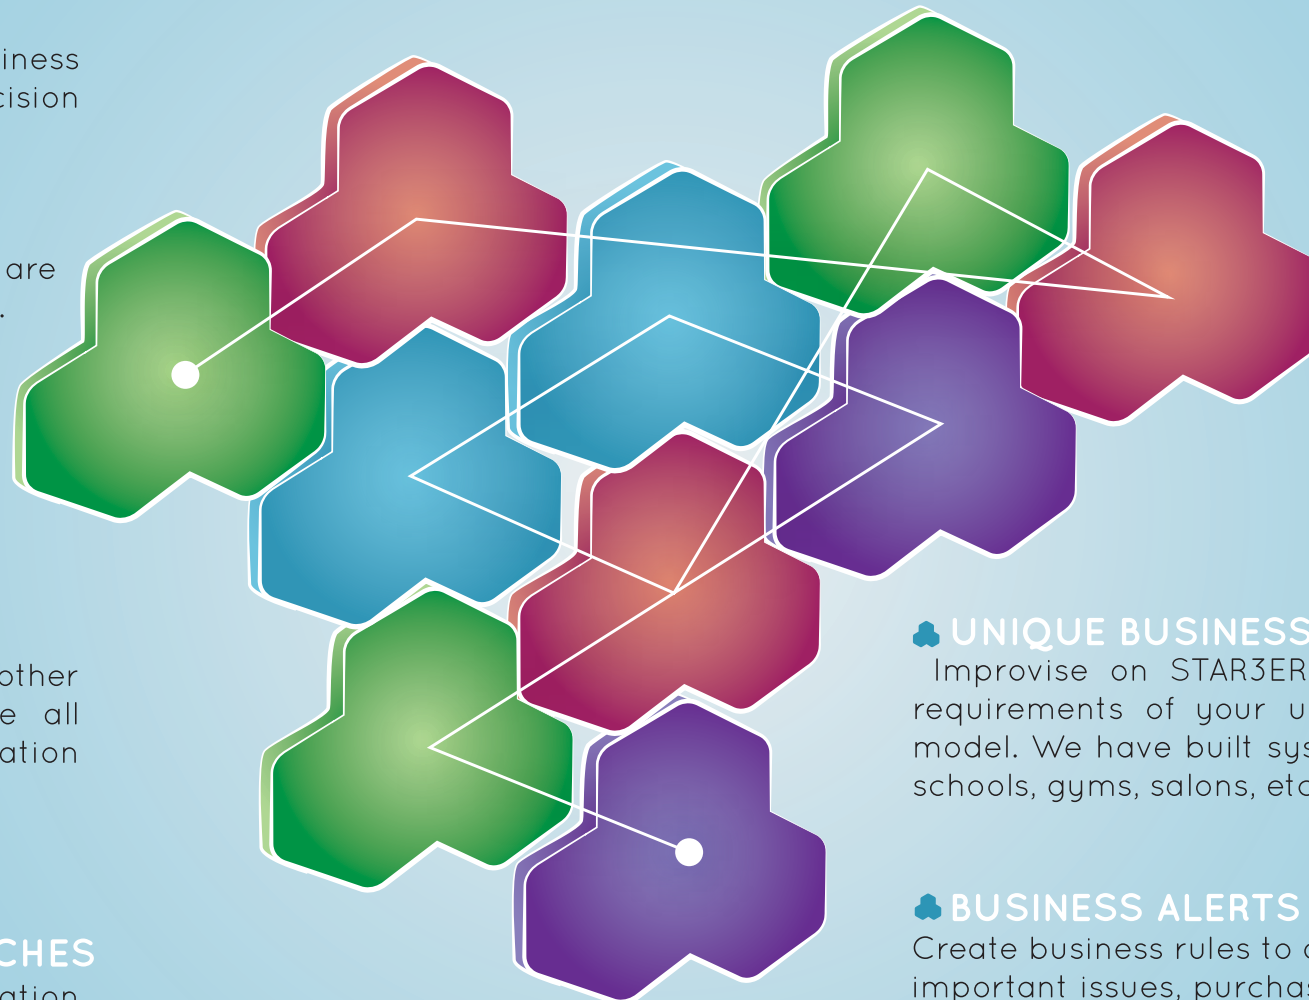

♣ UNIQUE BUSINESS SYSTEMS
Improvise on STAR3ERP to meet the requirements of your unique business model. We have built systems for many schools, gyms, salons, etc.

♣ BUSINESS ALERTS
Create business rules to alert you of any important issues, purchases, etc. Let the system keep an eye on your business for you.
